My comments/suggestions

What were the strengths of the course that supported your learning?

- The assistant is accessible, so that's a big plus.

- The opportunity to follow the code while Martial gave explanations, to see the meaning and logic of the code. I learned a lot

  during the practical sessions.

- Small groups

What areas could be improved and what are your suggestions for doing so?

- None

- More sessions to practice on R

- We always had to give presentations in the course after the practical sessions (history of economic thought), so we often didn't have time to come.

Additional question, specific to the teacher

Additional question, specific to the teacher (if you have been given instructions to this effect)

- None
